Mary Ann Weber  
Terry Defillipis  
Vonnie Mott  
Linda Lauerman  
Robert Burns  
Mike Galbraith

JUL 16 2018

In the median by DPW all trees and plantings have been completed. The new trees have bags on them for watering. Sprinklers are set up. Mike Galbraith has told us the sprinklers are not enough to water the trees and the water bags are needed if they are to survive.

The median by the police department needs additional red maples. Mike G to measure how many would be needed. The trees that are there now need pruning which Mike G will take care of. We could also add the plantings on the ends as the finished median. Discussion also about one more tree for the median by the cannon which belongs to the Garden Club.

The large median with no water was discussed. We have the whiskey barrels but discussion followed that trees and plantings would look more consistent. The consensus was to look into planting trees with the Gator water bags and to continue the pattern of the other medians. There is no cost difference between the red maple and Cherry trees. The whiskey barrels could be returned.

Discussion regarding Spratford Park since the gas station issue has been resolved. The plan is to plant Stella De Oro Lillies by the Watchung sign and Bob indicated one or two trees need to be replaced from the repairs, a Kwanzan cherry and/or a yoshino cherry.

One cherry tree missing by the Mountain boulevard gazebo needs replacement. Bob Burns will take care of that.

The sign at the bottom of Hillcrest Road was discussed again. There is a concern that there may not be enough room for whiskey barrels. Terri to take another look. Maybe we should just plant Lillie's or other perennials instead.

The two gardens at the bottom of the Boro Hall driveway were discussed. Suggested plants (all perennials) such as Lillie's, dwarf junipers, purple salvia.

Mike Galbraith has notes on what we will need and he will measure and put a proposal together.

Meeting adjourned. Next meeting to be determined.

*Respectfully submitted. Mary Ann Weber*
