Hi Edith,

Please add the following for discussion for this week's Council meeting.

T&B Commission voted on banners to purchase and place on Somerset Street to add to the "Veterans Banners" when up and then with the "Welcome to Watchung" banners when they are up. These Banners would utilize existing clamps and posts and DPW would install.

Design and cost attached and the funds would come from the Larger Beautification Budget all ready in place.

Thank you,

Christine

Riparian Restoration Proposal - East of Best Lake - Phase 2

By way of background, The Environmental Commission (EC) sponsored a stream restoration project along the East Branch of Stony Brook near the entrance to Best Lake as part of the 2022 Operation Pride/Earth Day event. The EC is happy to report that the plantings are thriving. Despite challenging heat and drought conditions, our members and DPW worked hard to water and maintain the plants and trees last summer. All six trees planted survived and are flourishing and 47 of the 50 understory sapling plants survived and are thriving. It should also be noted that the project was highlighted by the NJ Association of Environmental Commissions (ANJEC) in their fall newsletter in an effort to encourage other communities to follow Watchung's lead. (<https://anjec.org/wp-content/uploads/2022/08/Fall2022ANJECReport.pdf>)

The EC would like to build upon the success of this project and enhance this area further during the 2023 Operation Pride/Earth Day event. We are proposing to invite members of the community at 1:00 pm on Saturday, April 22, 2023, to assist us with the following:

1. Plant fifty (50) live stakes/cuttings near the stream bank in an effort to prevent erosion and establish additional native riparian vegetation along the stream. We are proposing Black Willow and Red Osier Dogwood cuttings for this activity.
2. Plant eight (8) additional understory plants to fill in around the existing plants (with deer protection). We are proposing Swamp Milkweed for this component of the project to further diversify the plant population and to support pollinators including Monarch Butterflies.
3. Add two bird boxes to the edge of the riparian corridor to enhance the habitat for Blue Bird, Wren, or Tree Swallow populations.
4. Maintain the existing plants including weeding, mulching, and replacing deer fencing.

As part of this project, the EC is also requesting the assistance of the DPW to remove two large patches of invasive Japanese Barberry (see attachment 1) in the park area adjacent to the plantings. Removing invasive species is an environmental best practice and will free up space in the park area for recreation and enjoying nature. The EC will mark the area for DPW if needed.

Project Goals

The project goals are to shade and enhance the stream which will improve water quality and fish habitat entering Best Lake. A healthy riparian habitat will also support pollinator and bird populations. In addition, as the tree and plant roots mature, they will help stabilize the stream bank and serve to slow erosion and sediment transport to the lake. Lastly, while these trees and plants alone will not eliminate area flooding, we view them as a step in the right direction and an essential part of a broader effort to mitigate flooding in the Borough.

The expenses for the project include deer protection, plants, live stakes, and bird boxes. The total estimated cost is \$1,000 which is well within the budget approved by the Mayor and Council for the EC.
